# Chad Koslovsky

## Cloud and systems engineering | Operate, automate, recover

Milliken, Colorado · chad@koslovsky.xyz

Senior Cloud Engineer | Elevations Credit Union

## 01 PROFILE

Systems engineer with enterprise, datacenter and direct client experience. Modernize workloads, implement identity boundaries and make delivery and recovery inspectable. Bring NOC escalation and SOC audit ownership to infrastructure that people depend on.

## 02 EXPERIENCE

**Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present**

Own infrastructure, application delivery and direct on-call support for a referral-based technical practice.

Implement Entra ID integrations, workload identities, secrets and tenant-aware access policies across client products and shared services.

**Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020**

Ran the NOC and handled engineering escalations; led through a company purchase and later held sole systems-engineering responsibility for about a year, with NOC first-line coverage.

Migrated workloads from Hyper-V and VMware ESXi into Docker and Kubernetes, upgraded servers and firewalls, and ran SOC 1/SOC 2 audits with recovery verification and documented controls.

**Systems / Software Engineer · Office Evolution | 2014-2015**

Built shared applications connecting CRM, provisioning, onboarding and service operations across locations.

Worked with the CEO and CIO to turn cross-department handoffs into explicit operational workflows.

**Network & Systems Engineer · PlumChoice / Everon | 2012-2014**

Engineered client networks, systems and endpoints in a managed-services environment, with direct business-owner and end-user support.

Used monitoring and built diagnostic tooling for recurring problems, with on-call coverage through investigation and recovery.

**Infrastructure and Systems Focal · IBM | 2010-2012**

Operated shared enterprise infrastructure and coordinated changes, incidents and escalations across application, infrastructure and vendor teams.

Automated audit and backup workflows and managed virtualization test labs and hosted desktop platforms.

## 03 SELECTED WORK

**Excell Services | Branch access and infrastructure renewal · Technomancy IT client engagement, Wray, Colorado**

For Excell Services LLC in Wray, a major Technomancy IT client, I rebuilt legacy servers and employee computers and upgraded the network. I connected a satellite location using VPN, Windows Server and Active Directory so corporate users had the access they needed. Following up on network costs also secured a one-time $15,000 CenturyLink refund.

**Technomancy platform | Traceable releases and backup inspection · Own technical practice and client-operations product**

For my client-operations platform, I built release tooling that tags images from Git, applies SQL migrations and records deployment status alongside health checks. A separate checksum-and-restore workflow uses disposable PostgreSQL to inspect backups. These implemented workflows give the support product a concrete delivery and recovery process, beyond simply keeping a copy of its data.

**ProofMark | Signing workflow and audit history · Client engineering contribution completed; AGPL/open-source product**

For ProofMark, a client signing product, I completed the design of a workflow joining identity, PDF fields, routing, audit history, encryption, verification and webhooks. Explicit security-sensitive states and fallback paths connect its UI, APIs and data into a signing flow. This application-side work is relevant when infrastructure and Information Security teams review how a service handles identity and preserves its history.

## 04 CAPABILITIES

Microsoft Azure setup/support; Microsoft Entra ID · Windows Server, Linux, Active Directory and VPNs · Terraform, PowerShell and Python automation · Docker/Kubernetes, Git and CI/CD · Monitoring, recovery verification and incident escalation
